

Business Intelligence Developer / Data Engineer

Location: 100% remotely from Nearshore

Job Type: Full-time

Company: Akkodis, **Client** - BMW Group

Seniority level: Middle – Senior (Senior would be better)

Overview:

We are seeking skilled Business Intelligence Developers / Data Engineers to join our dynamic Akkodis team of 3 experienced Data Engineers who are already involved into the project at our client. This role is crucial for transitioning the existing Qlik Sense applications to AWS QuickSight by the end of 2025.

Key Responsibilities:

- Develop and maintain data models in Snowflake, ensuring efficient data storage and retrieval.
- Design and implement ETL processes using AWS services such as Glue and Lambda.
- Work with SQL databases, including creating and managing tables, views, joins, and stored procedures.
- Understand and modify Qlik Sense scripts, leveraging general SQL and programming knowledge.
- Migrate existing Qlik Sense applications to AWS QuickSight, ensuring seamless functionality and performance.
- Collaborate with the core team at BMW to ensure the successful transition to the new platform.
- Participate in ongoing development and optimization of data solutions to meet business needs.

Qualifications:

- Strong knowledge of AWS services, particularly S3, Glue, and Lambda.
- Experience in data modeling within Snowflake.
- Proficiency in ETL processes and SQL databases (including tables, views, joins, and procedures).
- Familiarity with Qlik Sense scripting; ability to understand and modify scripts is essential, general understanding of SQL and program languages will be very helpful.
- Experience with AWS QuickSight is a plus, but not mandatory.
- Strong communication skills in English; proficiency in German is a plus.
